

Draft Common Response Review

Attached are draft Common Responses #3, Restoration Efforts, #5, Alternatives, #8, Keep Bay Fresh Water Flows, #9, Who Pays? Beneficiaries Should Pay, and #17, Response to Growth/ Planning Issues

The common responses address general comments made on the PEIS/EIR and appendices. In general, existing language from the PEIS/EIR, Revised Phase II Report, Program Plans and other PEIS/EIR appendices was used to develop the common response. Therefore, if you take issue with a draft common response, it probably will require subsequent review and adjustment of a Program Plan, the PEIS/EIR or other CALFED document.

The common responses are structured with an introduction summarizing the comments addressed in the common response. Information that addresses the general comment, or a recurring theme of the overall topic of the Common Response, is then presented to provide a response. The reader is then directed to sources within the PEIS/EIR, Program Plans or other appendices for additional information.

Please provide any comments by Friday, November 12, or direct questions to Nancy Ullrey at (916) 653-2354.
